

# Who We Are

## Accountability & Measures Authority

Healthcare Accountability often challenges stakeholders who are focused on improving population health and enhancing care delivery and outcomes. Through Technology, Data and Measures, Advanced Health Outcomes will assist your organization with Strategic Planning, Health Policy, Clinical Quality Measures Development and Implementation, Practice Improvement Activities, and Educational Services targeting efforts that are meaningful to patients and providers. As a clinician, translation researcher, and measures and quality improvement authority, AHO is grounded in offering "real-world" improvement solutions that reflect actual healthcare delivery. We partner with public, private and non-profit organizations, offering deliverables exceeding our clients' goals and expectations.

# Our Capabilities

## Employ HIT to Connect Practice Improvement & Accountability

AHO employs Innovative Analytics, Health Information Technology (HIT) & analytic tools to develop solutions for "real-world" clinical practice (e.g., web-based applications, artificial intelligence (AI), machine learning (ML), innovative data collections) to improve engagement and outcomes for healthcare end users - patients, providers, payers & stakeholders.

## Apply Data Mining & Analytics to Measures & Improvement

AHO utilizes current interoperability standards and innovative mining techniques in manual & electronic documentation to cleanse, analyze & trend hypothesized to actual quantitative and qualitative population, practice and payment variations that drive healthcare delivery and outcome improvements, ultimately reducing unnecessary costs.

## Develop Meaningful Measures to Drive Evidence-based Outcomes

AHO develops, harmonizes, maintains, and supports the endorsement and implementation of evidence-based, rigorous & meaningful measures & quality improvement products for accountability, performance improvement, clinical registries & local uses. Collaborators include: CMS, AHRQ, AMA-PCPI, ABIM, ACEP, AAN and other measure stakeholders.

Bettering Populations with Technology, Data & Measures

Women Owned Small Business  
NAICS Codes: 541690, 519190, 541519, 541611, 541618, 541720, 541990 & 611710

### **Strategic Planning**

AHO partners with organizations to balance known mission-driven value propositions with alternative growth prospects. We provide annual and triennial strategic planning, business development, stakeholder engagement, collaborative partnership development, proposal response modeling, teaming and writing, and public speaking.

### **Health Policy**

AHO is a healthcare consulting firm for public, private and nonprofit stakeholders in traditional and matrix organizations offering public health thought leadership related to policy formation, business development and accountability. We offer policy interpretation, analysis and strategic planning of public policy, rulemaking and healthcare regulations.

### **Measurement Science**

AHO develops, harmonizes, supports endorsement, implements and maintains manual and electronic clinical quality measures for MIPS, clinical registries & local uses. Our measures reflect evidence-based care, high importance and usability, and are patient-centered. Collaborators include: CMS, AHRQ, AMA-PCPI, ABIM, ACEP, AAN and enumerable other public & private entities.

### **Practice Improvement**

AHO employs contemporary performance science methodologies to improve clinical, patient and cost outcomes by focusing on high impact care delivery and burden reduction implementation strategies. We utilize accurate and timely data collection techniques, rapid-cycle sampling and iterative user-centric "tests of change".

### **Learning & Growing**

AHO develops orientation, educational and instructional products for patients, providers and collaboratives building individual and team knowledge and professional competence. Select offerings include Measures 101, Measurement Science, Data Collection Methods, Measure Testing, Practice Improvement, and HIT Interoperability & Vocabulary Standardization.
